## “B Show” Suggested Staging & AV

**STAGING:** Two 12'x16' risers, stairs for each, arranged as shown with one in the corner.

**LIGHTING:** If your facility has lighting, the preferred setup is two lights as shown, one with no gel, one with a blue gel. Curt provides lighting with the “Deluxe Package” version of Show B.

**SOUND:** Curt normally brings a PA system with Show B. However, if a PA is already in place, three XLR inputs are needed on the mixer, or two XLR inputs and one stereo unbalanced input (RCA or 1/4”). Two tower speakers are recommended. Curt provide his own microphones and music with Show B.

Magic + Comedy = *Entertainment!*
